REGION II
HABITAT AND RESTORATION
DIVISION

Dear Mr. Seaberg;

I beleive that you have already seen the enclosed pictures, however I would like to add my voice requesting that something be done to alleviate this very dangerous situation.

Any seepage from the oil waste would enter Dry Creek which has a substantial spawning run of red salmon during July and August. Also, in the past we used Dry Creek for our water source. If these wastes enter the aquifier, the spring located by the power line crossing of the Crescent Creek road could become contaminated as well, and this spring is used daily by many residents as well as tourists from closeby campgrounds.

I would hope that you and your department would add your voice to not only cleaning up the existing problem, but speak out against the illegal lumber activity that has taken place in the area and the number of individuals squatting on so called mining claims.

The proposed Kenai Peninsula Borough Ordinance 95-09 not only would condone previous illegal activity but extend these people priviledges that other residents of Cooper Landing do no enjoy. If approved it will be an open invitation to anyone to come to the Kenai and squat on any unapropriated land. Since the most desirable land is on or near water, this would create an unmanageable prolem for critical salmon habitat.

I would request your support in urging the Kenai Peninsula Borough Assembly to reject Ordinance 95-09

Sincerely,

Robert E. Wilson
